OBJECTIVE

I'm Junior Web Developer with almost a year of experience, seeking for a creative and challenging position which utilizes current knowledge of web development and design. I've created four web based projects from scratch and keep improving them. Having a positive outlook and am always willing to learn new traits. I'm goal oriented, effective communicator, able to solve problem also I work well both independently and as part of a team. I'm looking for an junior position of a front-end developer.

PROFESSIONAL SKILLS

JavaScript | CSS/SASS/LESS | HTML | React | GIT |
Webpack | Bootstrap | REST API | AJAX | JSON |
jquery | RWD | LocalStorage | SEO | GitLab | GitHub |

WORK EXPERIENCE

04/2020 – Currently

Junior Front -end developer working to improve processes and procedures projects.

01/2021 Project SavvyTime I've implemented "Add to Calendar" functionality for a popular website (savvytime.com) and Chrome Extension ([savvytime](https://chrome.google.com/webstore/detail/savvytime)) that specializes in time converting. It allows to export an event to his personal calendar in Google, Iphone, Outlook or Yahoo. **JavaScript, HTML, CSS/SASS, moment.js, JQuery, Webpack, LocalStorage** technologies used to implement this feature.

10/2020 Project Ravenous is supported by using such framework as React and moreover the project connects API REST address with Yelp website. At last spinner function is launched to inform that site is in process of loading and Enter button is added for the users to confirm downloading data. Used form validation. [Code](#) / [Live](#)

09/2020 Project Jamming it's main task is to help users in creating and saving new playlist of songs on one's Spotify profile. Mostly I use React and Java Script, HTML, CSS cods. To start to use this program you need to login on Spotify profile in order to provide connection between sites using API REST. [Code](#) / [Live](#)

HOBBIES

- Music
- Travel
- Ride bike
- Swimming
- Jogging
- Physics
- Computer games

06/2020 Project WeatherWebSite helps users to find out the weather forecast wherever they are. Additionally this app can provide you with information about your localization. Moreover, the Google function of autocomplete is used in order to help users to input geographic place faster. This project was supported by HTML, CSS, JavaScript cods. The main task of this project is connecting API REST address with another website. In generally this App created only for phones devices. [Code](#) / [Live](#)

05/2020 WebSite for musicians My first project is dedicated to represent me as a musician. For its design, Java Script, HTML, CSS and Bootstrap cods are used. Also the links to my social media are accessible. [Code](#) / [Live](#)

2011 - 2019 Musician | Teaching | Private Music School (Cracow, Poland)
